**Plugs** are cultured from tissue culturing and not from seeds. This allows us to get the best genetic material with the best selected characteristics. Thus all the plants will be the same, and not different when you use seeds. The plugs are +/- 30cm tall and will require to be planted into bags for their root system to strengthen. This can take up to 10 months.

**Pros.:** Using plugs helps the plant to adjust to the climate easier.

It is also more cost effective transport wise and you can be part of the nurturing of the bamboo in your own nursery. Ideal for Commercial Farming.

**Cons.:** Plugs must be replanted in 2,5 Liter bags, filled with a sand mixture with added Bio ganic/something similar and kept for up to 10months before it can be replanted. There might be a **lead time of 3 – 6 months** to prepare large quantities of plugs.

**Orders:** Please request a quote to make sure we can stock your order, as our stock changes daily. You will receive a Quote/Invoice with the added estimated courier cost. This order will only be valid for 2 days.

The orders takes +/-5 – 10 working days to be delivered once the payment has been cleared in our bank or on the first working Monday. The courier cost per box is +/- R280/box.
